

IRONSCALES

World's 1st Automated Phishing
Prevention, Detection & Response Platform

Secure The Mailbox. Not Just The Email Server!

Get the next generation in anti phishing protection. IRONSCALES, the world's first automated phishing prevention, detection & response platform.

Why IRONSCALES Anti Phishing Platform?

1. _____

Simple Deployment

Deploy in two-clicks with Office 365/ Exchange and G Suite. No MX record changes required.

2. _____

Smarter Mailboxes

With proprietary inbox augmentation technology, employees can make better security related decisions, becoming better reporters and part of the solution against advanced phishing threats.

3. _____

Automated Response

Streamline and automate incident analysis and response from employee phishing reports, reducing the time phishing emails lie idle in mailboxes.

4. _____

User-led Intelligence

Benefit from anonymous peer2peer actionable intelligence from other certified analysts within the IRONSCALES global community.

Targeted Phishing Emails Are...

1. Bypassing Gateway Solutions

Secure Email Gateways lack advanced threat defense capabilities

2. Going Undetected

Security teams are understaffed & overburdened with security events & alerts

3. Luring Clicks

Phishing emails have become more sophisticated for end users to detect & some people will never learn

The Fastest Phishing Detection to Response

IRONSCALES improves SOC response, efficiency, and effectiveness.

Less than
60 seconds *

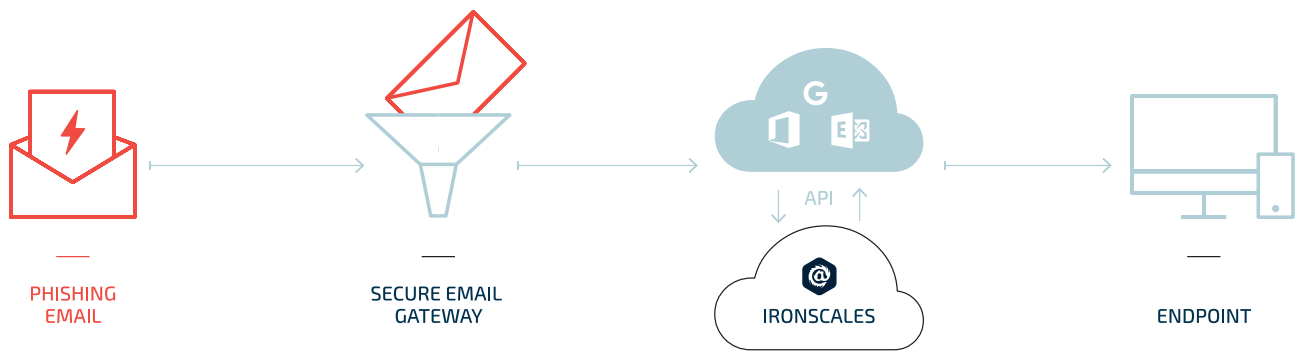

55% of attacks were discovered and remediated in less than 60 seconds

5 min result *

75% of attacks were discovered and remediated in less than 5 minutes

* This data was taken from The IRONSCALES 2017 Global Phishing Trend Report
